EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Paul A. Levy on 10/20/2009.

2. Claims 8, 10, 18, 20, 28 and 30 are cancelled. Applicant's right is reserved to file divisional application(s).

3. Claims 21-27 and 29 are amended as sets forth below.

21. (Currently Amended) A non-transitory computer-readable storage medium storing a computer program for causing a computer to execute a data processing method, said data processing method comprising the steps of:

detecting completion of preparations for outputting first data read from a data recording medium which stores said first data and second data corresponding to said first data and having a data amount smaller than that of said first data, wherein said first data are made up of a continuous collection of clips, said first data being reproduced on a clip by clip basis;

calculating a current clip read ending position and a next clip read starting position;

determining whether the current clip remaining read duration is less than or equal to the difference between the current clip remaining reproduction duration and a next clip reproduction preparation duration; and

outputting selectively said second data read from said data recording medium until the completion of said preparations for outputting said first data is detected,

wherein said outputting step further comprises: outputting selectively said first data once the completion of said preparations for outputting said first data is detected,

utilizing a ready flag to denote a status of the preparations based upon the determining step.

22. (Currently Amended) The non-transitory computer-readable storage medium according to claim 21, wherein said data processing method further comprises the steps of:

firstly controlling reproduction of said first data;

and secondly controlling reproduction of said second data;

wherein said first controlling step controls the reproduction of said first data in response to the reproduction of said second data controlled in said second controlling step.

23. (Currently Amended) The non-transitory computer-readable storage medium according to claim 21, wherein said first data and said second data corresponding to said first data are stored intermittently on said data recording medium.

24. (Currently Amended) The non-transitory computer-readable medium according to claim 21, wherein said first data are video data and said second data are video data obtained by lowering resolution of the video data constituting said first data.

25. (Currently Amended) The non-transitory computer-readable storage medium according to claim 24, wherein said data processing method further comprises the step of resizing the video data constituting said second data into the same size as that of said first data.

26. (Currently Amended) The non-transitory computer-readable storage medium according to claim 21, wherein said data processing method further comprises the step of decoding said first data furnished as encoded data; and wherein said detecting step detects completion of preparations for outputting results of the decoding performed in said decoding step.

27. (Currently Amended) The non-transitory computer-readable storage medium according to claim 21, wherein said data processing method further comprises the step of reading said first data and said second data from said data recording medium.

29. (Currently Amended) The non-transitory computer-readable storage medium according to claim 27, wherein said reader stops reading of the current clip from said

Art Unit: 2621

data recording medium in said current clip read ending position and starts the reading of the next clip from said next clip read starting position.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HELEN SHIBRU whose telephone number is (571)272-7329. The examiner can normally be reached on M-F, 8:30AM-5PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, THAI Q. TRAN can be reached on (571) 272-7382. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
